

CARING FOR YOUR ROOF

To ensure that your new Roof remains beautiful and functional for years to come, we encourage you to carefully read through this guide.

Inside, you'll find essential tips on maintenance and warranty.

CLEANING

Dirt and debris can be removed by regularly high pressure washing your roof.

Removing grime and materials that cling to your roof will help keep it in good condition. Engaging in a professional to clean your roof once a year is recommended in order to help prevent growth of mould and lichen.

TILE BREAKAGE

Additional replacement tiles will be painted and left for each customer. If any tiles are to break after a restoration is completed, they can be replaced by the customer with the spares provided.

GUTTERS

Gutters should be checked regularly and any debris, leaves, and dirt removed. Regular gutter maintenance will ensure there's no build-up of debris that could cause future gutter blockages or water damage to your home.

WARRANTY

Any breaks caused by the customer or other contractors after the job has been completed will not be covered under the warranty. This includes the installation of solar panels and air conditioners.

Any areas not restored due to existing solar panels are not covered under the Just Quality 15 year guarantee.

For additional warranty information, please refer to acryloc.com.au or justquality.com.au

GENERAL MAINTENANCE

When walking on your roof, avoid standing on the middle of tiles to avoid breaks, both for your roof and your own safety.

Keep any trees that overhang or drop leaves on your roof pruned regularly. This will help to avoid future roof damage from branches or organic matter, and also prevent animals from climbing onto your roof, potentially causing damage.

Just Quality recommends having your roof restored every 15 years. Existing customers are entitled to a significant price reduction on every subsequent restoration.

Thank you for choosing Just Quality! We hope you enjoy your upgraded Roof for years to come.
